INDUSTRIAL WASTE

Industrial waste refers to solid waste discharged by machinery, light industry and other industries during the production process. It is mainly divided into five categories: food waste, general waste, construction waste, cleaning waste and hazardous waste. JONO uses the mature automatic sorting production line for industrial waste to manufacture raw materials for construction materials such as cement, concrete aggregate, brick and tile. Extract iron, aluminum, copper, zinc, nickel and other metal resources and manufacturing fertilizers and soil conditioners.
